

Billing & Payroll

Audit Tool Standard Operating Procedure

1. Purpose

The RAH Billing & Payroll Audit Tool is a browser-based application that automatically analyzes WellSky billing and payroll PDF exports to detect errors before the weekly billing run. It replaces the manual shift-by-shift review process by parsing both reports, cross-referencing data, and producing a categorized list of flags that require action or verification.

The tool is designed for use by the billing coordinator as both a pre-review detection system (before CCMs review) and a post-review verification system (after CCMs have made their corrections).

2. Prerequisites

- A modern web browser (Google Chrome recommended)
- The audit_tool.html file saved locally on your computer
- Billing PDF exported from WellSky (filtered by office before export)
- Payroll PDF exported from WellSky (full, unfiltered, all caregivers)

Important: The billing PDF should be filtered by office in WellSky before exporting. The payroll PDF is exported without filters. The tool automatically cross-references only the shifts that appear in both reports.

3. How to Use the Tool

3.1 Exporting PDFs from WellSky

1. Log into WellSky Personal Care
2. Navigate to Accounting > Billing
3. Set the Care Dates to the week being audited
4. Filter by office (Select Clients > filter by office tag)
5. Click the printer/export icon to generate the PDF
6. Save as 'Billing Report.pdf'
7. Navigate to Accounting > Payroll
8. Set the same Care Dates, do NOT filter by office
9. Export and save as 'Payroll Report.pdf'

The screenshot shows the WellSky Billing interface. The top navigation bar includes Dashboard, Clients, Caregivers, CareFinder, Accounting, Reports, Care Requests, and Workflow Tasks. The main header shows 'Billing' with sub-tabs for Accounting, Billing, Payroll, Receivables, Electronic Transactions, Scheduled Payments, Electronic Claims, Holidays, and QuickBooks Integration. The 'Billing' sub-tab is active.

Annotations on the screenshot include:

- A red arrow pointing to the 'Select All' button in the 'Clients/Communities' section, with a text box stating: "Click in 'Select All', to check all the clients/caregivers."
- A red arrow pointing to the 'Care Dates' dropdown menu, with a text box stating: "Select the dates that you want to audit".
- A red arrow pointing to the 'Print' button at the bottom right, with a text box stating: "Click on 'Print' to save download the report."

The main table displays a list of clients and their associated services. The columns include Date, Reg, OT, DOT, Auth, Rate, and Total. The table is filtered by 'Care Dates' and 'Clients/Communities'.

Date	Reg	OT	DOT	Auth	Rate	Total
5/31 8:45a-10:45a	3.75				\$32.00/hr	\$120.00
6/1 8:45a-10:45a	2				\$45.00/hr	\$90.00
6/2 8:45a-10:45a	1.75				\$45.00/hr	\$78.75
Total	7.50	0.00	0.00			\$288.75

At the bottom of the page, there are buttons for 'Delete', 'Print', 'Finalize', and 'Invoice'. The 'Print' button is highlighted with a red arrow.

Billing Report - 05/31/2026 - 06/03/2026

Address, Location	Date	Rtg	OT	DOT	Amt	Rate	Total
Kramer Motors	6/2/26 10a-2p	1.75			\$52.00/hr		\$128.00
Mileage: Estimate: grocery shopping, get client food	Jun 02 - 10:2 miles				\$1.00/mile		\$10.20
	10.2 miles	1.75	0.00	0.00			\$128.20

You will get a file like this. Press Ctrl + "P" to save as PDF file. Make sure that you note on the file name if it is Billing or Payroll file.

3.2 Running the Audit

10. Open audit_tool.html
11. Drag or click to upload the Billing PDF in the left zone
12. Drag or click to upload the Payroll PDF in the right zone
13. Click 'Run Audit'
14. Wait for the progress bar to complete, the tool will display results automatically

Upload the billing and payroll Files and attach them. Once you click on "Run Audit", you will get all the errors/flags

Upload the billing and payroll Files and attach them.
Once you click on "Run Audit", you will get all the errors/flags

3.3 Reading Results

Results are organized into two sections:

- Flags tab: All detected errors grouped by severity (Require Action first, then Need Verification)
- Mileage tab: Complete list of all mileage entries for manual review

Each flag card shows:

- Report badge: BILLING (green), PAYROLL (orange), or B+P (purple, appears in both)
- Entity: The clients name (billing) or caregiver name (payroll)
- Counterpart: The other party (CG or client)
- Flag type: The category of error
- Detail: Specific description of what is wrong and what to do
- Severity: ACTION (must fix) or VERIFY (needs manual confirmation)

3.4 Filtering and Searching

Use the search bar to find a specific caregiver or client by name. Use the filter chips to narrow results by error type. Click 'Export CSV' to download all flags and mileage data for KPI tracking.

4. Flag Types Reference

The following table describes every flag type the tool can generate, what it means, and the expected action.

Flag Type	Description & Action	Severity	SOP Ref.
Hours / Visit: non-whole hours on visit shift	A visit shift has decimal hours (e.g., 1.75, 2.5). Visit shifts must be whole numbers (1, 2, or 3). Adjust the clock-in/out time to the nearest whole hour.	ACTION	B
Hours / Visit: 15-min overage (3.25 hrs)	The visit shift is exactly 3.25 hours. Round down to 3 hours and keep the visit rate.	ACTION	B
Hours / Visit: exceeds 3-hour visit limit	A visit shift exceeds 3.25 hours (e.g., 3.5, 3.75). Must change to hourly rate since it now qualifies as 4+ hours.	ACTION	B
Hours / Visit: hourly shift under 4 hours	A private pay hourly shift is less than 4 hours. Shifts of 3.25 hrs or less should be visit rate. Shifts between 3.25 and 4 should be rounded to 4 hrs hourly. Exception: VA/AAA/GUIDE clients (always hourly) and private pay shifts on the same day as a VA/AAA shift for the same client.	ACTION	B
Hours / Auth: decimal hours on auth client	A VA, AAA, or GUIDE client has decimal hours. Auth client shifts must always be whole numbers. Correct the clock time.	ACTION	C
15-Min Increment violation	A VA/AAA/GUIDE shift has a clock-in or clock-out that is not on a 15-minute increment (:00, :15, :30, :45). Adjust the time to the nearest 15-minute mark.	ACTION	C
GUIDE shift under 4 hours	A GUIDE client shift is less than 4 hours. GUIDE shifts have a minimum of 4 hours.	ACTION	C
Rate Inconsistency	The same CG has two different rates of the same type (hourly vs hourly, or visit vs visit) for the same client. Different rate types (hourly + visit) for the same client are acceptable. VA + Private Pay dual setup is also acceptable (auth shifts at VA rate, non-auth at private rate).	ACTION	A
VA/AAA/GUIDE Rate validation	A VA shift is not billed at \$38.00/hr, an AAA shift is not at \$29.00/hr, or a GUIDE shift is not at \$32.67/hr. Correct the billing rate.	ACTION	C
\$0.00 / Missing Note	A shift has \$0.00 or N/A billing. If it has a 'note' tag, verify documentation is complete (note + billing/payroll tag + checkbox). If it does NOT have a note, the sticky note is missing, add documentation before billing run.	ACTION	D
Pay Don't Bill	Billing shows \$0.00 with note, and payroll shows normal payment for the same shift. This is a Pay but Don't Bill pattern (e.g., client not home, CG sent home early). Verify documentation is in both billing AND payroll. If note is missing in payroll, add it.	ACTION	I

Holiday Rate (h)	A shift has the 1.5x holiday rate applied. Verify the date was an approved company holiday.	VERIFY	E
Overtime	A non-live-in shift has OT hours > 0. Verify the overtime was authorized. Note: live-in CG overtime is always approved and is not flagged.	VERIFY	F
Mileage (auth client)	A VA/AAA/GUIDE client has mileage entries. All mileage for auth clients must be verified for authorization.	VERIFY	G
Live-In rate error	A live-in CG pay rate exceeds \$7.50/hr (standard is \$7.25). Or a live-in client is being billed at visit rate instead of hourly/live-in.	ACTION	H
Shift Overlap	Two different CGs have overlapping shift times on the same day for the same client. Verify schedules and correct clock times. System boundaries (11:59p) are excluded.	ACTION	H
Billing/Payroll Mismatch	The same shift is billed as one rate type (e.g., visit) but paid as another (e.g., hourly). Both must match, if billing is visit, payroll must be visit for the same shift.	ACTION	

5. Billing Rules Quick Reference

5.1 Rate Types

Type	Duration	When to Use	Notes
Visit	1, 2, or 3 hrs	Shifts of 3.25 hrs or less	Must be whole numbers
Hourly	4+ hours	Shifts over 3.25 hrs	Bill actual hours worked
Live-In	24 hours	24/7 coverage clients	CG paid \$7.25/hr (max \$7.50)

5.2 Auth Client Rates

Program	Billing Rate	Auth Format	Identification
VA	\$38.00/hr	...NNN (numbers)	Auth column ends in digits
AAA	\$29.00/hr	...abc (letters)	Auth column ends in letters
GUIDE	\$32.67/hr	...IDE	Client name contains GUIDE

All auth client shifts must have whole-number hours and clock times on 15-minute increments.

5.3 Visit Hour Thresholds

- Decimal hours on visit: adjust clock time to nearest whole number
- Exactly 3.25 hours (15 min over): round down to 3 hours, keep visit rate
- More than 3.25 hours: must change to hourly rate (4+ hours)
- Hourly shift under 4 hours (private pay): should be visit rate

5.4 Excluded Entries

The following entries are automatically excluded from all audit rules:

- RAH Incentive / Bonus profiles, internal incentive payments
- RAH Orientation profiles, new hire orientation sessions
- HCP / Training profiles, internal training sessions
- Food stipend entries, \$25.00/visit shifts of 1 minute or less on live-in clients
- Live-in overtime, always approved, not flagged
- Live-in (A)/(B) system segments, 11:59p/12a boundaries are system splits, not real clock times

5.5 VA + Private Pay Setup

Some clients have both VA authorization and private pay hours. On the same day, the same CG may have a VA shift (with auth number, billed at \$38/hr) and a private shift (without auth, billed at the client rate). This is intentional and is NOT flagged as a rate inconsistency.

6. Mileage Review

The Mileage tab lists every mileage entry found in the billing PDF. Each entry shows the client, caregiver, miles claimed, the reason/note, and whether the client is an AUTH (VA/AAA/GUIDE) or PRIVATE pay client.

Auth client mileage is always flagged for verification in the Flags tab. For private pay clients, review the mileage note for reasonableness. Watch for:

- Descriptions like 'work to home' or 'home to client', these are not reimbursable
- Unusually high mileage claims without clear justification
- Clients tagged 'NO DRIVING' who have mileage entries

7. Deduplication

When the same error appears in both the billing and payroll PDFs (same caregiver, same client, same date, same error type), the tool shows it as a single flag with a purple 'B+P' badge instead of two separate flags. This is because correcting errors in Wellsky automatically updates both billing and payroll.

8. Troubleshooting

- Tool shows 0 flags: Ensure both PDFs are actual WellSky exports, not scanned images. Try opening in Google Chrome.
- Missing clients: Client names with mixed capitalization (e.g., MacDonald, McPherson) are supported. If a client is still missing, check if their page in the PDF has a non-standard format.
- Mileage not detected: If a mileage entry has a very long note that wraps across lines in the PDF, the tool may not capture the miles count. Check the mileage tab, if the entry appears with 0 miles, the note was detected but the mileage amount was on a separate line.
- PDF won't load: Ensure the file is a .pdf, not .xlsx or other format. The tool requires the Print/Export PDF from WellSky, not a screen capture.
