

File Naming Standardization.

Standard operating procedure.

File Naming Standard

Field	Detail
Applies to	All office staff
Platforms covered	WellSky, Paycore
Effective date	2025
Version	2.1
Owner	Client Care Manager

1. Purpose

This SOP establishes a mandatory file naming standard for all documents uploaded to or downloaded from WellSky and Paycore. Consistent file names eliminate confusion, reduce errors during audits, and enable reliable automation and reporting.

2. Scope

This standard applies to:

- All staff who upload, download, or rename documents in WellSky or Paycore
- All client records (any payer type)
- All caregiver records

Paycor documents are system-generated with fixed names and must NOT be renamed. They are listed in Section 6 for reference only.

3. Naming Schema

3.1 Client files

CLIENT	PAYER	LASTNAME	FIRSTNAME	DOCTYPE	YYYY-MM-DD	SOURCE
--------	-------	----------	-----------	---------	------------	--------

Example: CLIENT_VA_WAGGONER_DOW_VASV_2025-08-19_WS

3.2 Caregiver files

CG	LASTNAME	FIRSTNAME	DOCTYPE	YYYY-MM-DD	SOURCE
----	----------	-----------	---------	------------	--------

Example: CG_LAWRENCE_DONNA_ANNBGC_CBC_2025-07-04_WS

3.3 Formatting rules

- All characters must be UPPERCASE
- Segments are separated by underscores (_) only — no spaces, dashes, or slashes
- Date format is always YYYY-MM-DD (e.g., 2025-08-19)
- No special characters: no parentheses, periods, #, \$, or accented letters
- File extension (pdf, .docx, .jpeg) is added after the name, it is not part of the standard

4. Segment Reference

4.1 ENTITY

Code	When to use
CLIENT	Document belongs to a client
CG	Document belongs to a caregiver

4.2 PAYER OR CLIENTS

The client determines which additional documents apply to this client. Always confirm the client before uploading.

Code	Payer	Notes
VA	Veterans Affairs	Requires VA-specific docs: VAAGMT, VAIOC, VASV
LTC	Long Term Care	Insurance-funded long-term care
PRV	Private	Self-pay clients
GUIDE	Guide	Guide program clients
AAA	Area Agency on Aging	Requires SWO and TASKLIST docs

4.3 SOURCE

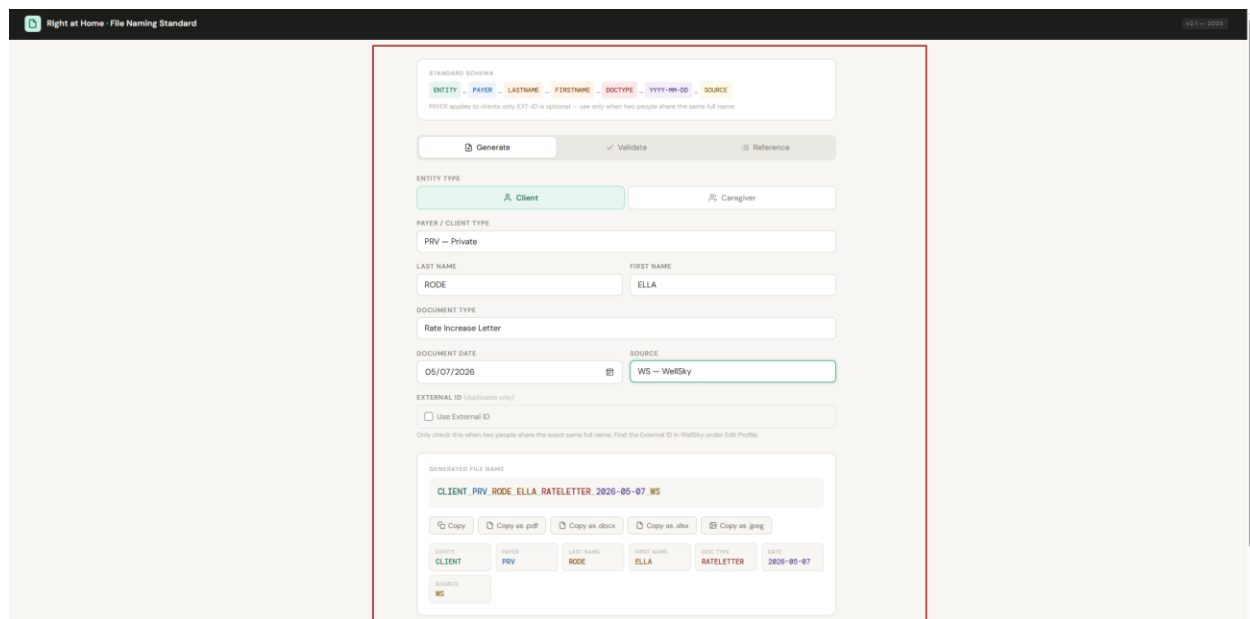

Code	Description
WS	Downloaded from or uploaded to WellSky
PC	Downloaded from or uploaded to Paycore
EXT	Received from an external party (physician, insurance, agency)
INT	Created internally in the office (not from a system)

5. How to Use the File Naming Tool

The File Naming Tool is a standalone HTML file. Open it in any browser, no installation required. Share it via email or a shared Drive folder.

5.1 Generate a file name

1. Open RAH_DocNaming.html in your browser.
2. Select the entity type: Client or Caregiver.
3. If Client: select the Payer (VA, LTC, PRV, GUIDE, or AAA).
4. Enter the Last Name and First Name exactly as they appear in WellSky, uppercase, no accents.
5. Select the Document Type from the dropdown.
6. Set the Document Date to the date on the document itself, not today's date.
7. Select the Source (WS, PC, EXT, or INT).
8. The file name generates automatically. Click Copy, Copy as .pdf, or Copy as .docx.
9. Paste the copied name directly when saving or renaming the file.

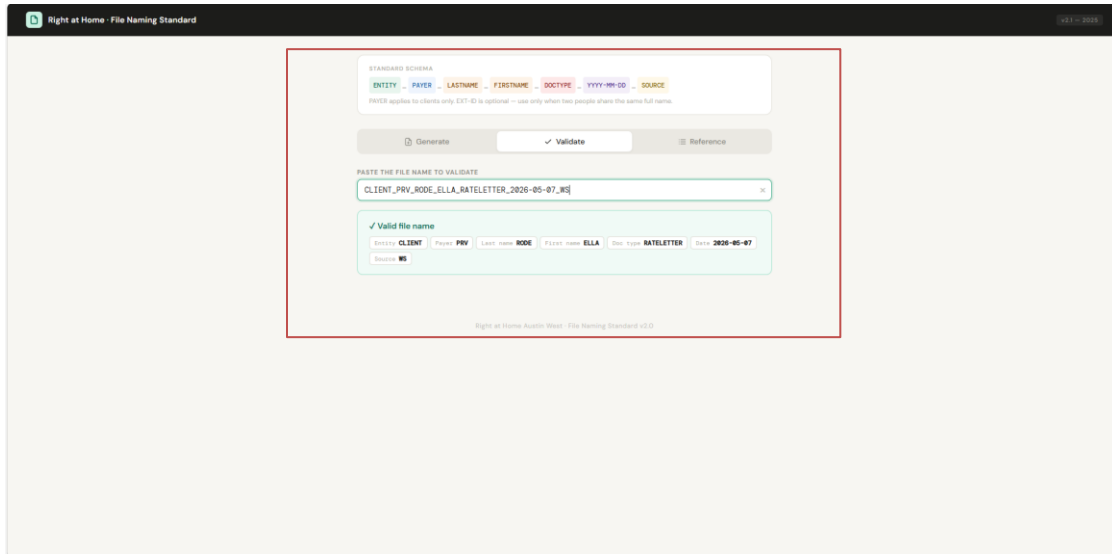

The screenshot shows the 'Right at Home - File Naming Standard' web application. The interface is divided into several sections:

- STANDARD SCHEMA:** A legend showing the components of the file name: ENTITY - PAYER - LASTNAME - FIRSTNAME - DOCTYPE - YYYY-MM-DD - SOURCE.
- Generate / Validate / Reference:** Action buttons at the top.
- ENTITY TYPE:** Radio buttons for 'Client' (selected) and 'Caregiver'.
- PAYER / CLIENT TYPE:** A dropdown menu currently showing 'PRV - Private'.
- LAST NAME:** A text input field containing 'RODE'.
- FIRST NAME:** A text input field containing 'ELLA'.
- DOCUMENT TYPE:** A dropdown menu showing 'Rate Increase Letter'.
- DOCUMENT DATE:** A date picker showing '05/07/2026'.
- SOURCE:** A dropdown menu showing 'WS - WellSky'.
- EXTERNAL ID:** A checkbox labeled 'Use External ID' (unchecked) with a note: 'Only check this when two people share the exact same full name. Find the External ID in WellSky under Full Profile.'
- GENERATED FILE NAME:** A box displaying the generated file name: 'CLIENT_PRV.RODE.ELLA.RATELETTER.2026-05-07.WS'.
- Copy Options:** Buttons for 'Copy', 'Copy as .pdf', 'Copy as .docx', 'Copy as .xlsx', and 'Copy as .png'.
- Summary Table:** A table at the bottom summarizing the inputs:

ENTITY	PAYER	LAST NAME	FIRST NAME	DOCTYPE	DATE	SOURCE
CLIENT	PRV	RODE	ELLA	RATELETTER	2026-05-07	WS

5.2 Validate an existing file name

10. Go to the Validate tab.
11. Paste the file name (with or without extension).
12. The tool checks each segment and displays errors in red and warnings in yellow.
13. A green result means the name is fully valid.

7. Handling Duplicate Names

When two people share the exact same full name, add their External ID as a final segment to distinguish the files.

7.1 How to find the External ID in WellSky

14. Open the client or caregiver profile in WellSky.
15. Click Edit Profile.
16. Locate the External ID field.
17. Copy the value, this is what you add at the end of the file name.

7.2 Schema with External ID

```
CLIENT_PRV_GARCIA_MARIA_INTAKE_2025-05-07_WS_EXT4821
CLIENT_PRV_GARCIA_MARIA_INTAKE_2025-05-07_WS_EXT9034
```

Only use the External ID when a true duplicate exists. Do not add it by default. If you are unsure, check WellSky before uploading.

7.3 In the File Naming Tool

Check the "Use External ID" checkbox in the Generate tab. A field will appear to enter the External ID. The schema display at the top of the tool updates to show the EXT-ID segment.

8. Adding or Updating Document Types

The list of valid document types is maintained inside the File Naming Tool (RAH_DocNaming.html). To add a new document type:

18. Open the HTML file in a text editor (Notepad, VS Code, or similar).
19. Press Ctrl+F and search for BEGIN CONFIG.
20. Locate the appropriate array: wellsky (clients), paycore, or other.
21. Add a new line following this exact format:

```
{ code: 'NEWCODE', label: 'Full document name' },
```

22. Save the file.
23. Redistribute the updated file to all staff via email or shared Drive.

Use uppercase codes without spaces or special characters. Keep codes short (6-10 characters). Coordinate with the Client Care Manager before adding new codes.
