Staffing Note Convention - Quick Guide

Why we are doing this

As part of our new metric system, we are adding one short prefix at the start so our reporting can classify every staffing event correctly and fairly, without guessing.

The one rule

Start the note with the matching prefix (including the period), then write your note exactly as you always do. Nothing else changes.

Example:

`"CG CANCEL. CG can't make it today, she has a fever. Looking for coverage now. – NC"`

The nine prefixes

Prefix	When to use it	Real example
`TORF.`	Caregiver requests time off in advance (planned absence)	TORF. CG requested 7/30 and 7/31 off for a medical procedure. Advised her to fill out the time-off request form. - WA
`CG CANCEL.`	Caregiver cancels or cannot make their shift (with notice)	CG CANCEL. CG can't make it today, she had a family emergency. - NC
`NCNS.`	Caregiver did not show up and did not call (discovered at shift time)	NCNS. CG did not show up for the 9 AM shift. Client's daughter called to report it. - KV
`CL CANCEL.`	Client cancels their own visit (appointment, not home, personal choice)	CL CANCEL. CL has a doctor's appt this day and will not be home. - SK
`NO REPL.`	Client is fine without coverage / does not need a replacement	NO REPL. CL's wife stated they don't need a replacement, their son is there this week. - NC
`CL REFUSED.`	A replacement was offered and the client declined it	CL REFUSED. Offered Maria for the 12-4 shift, CL refused due to the times. - WA
`RESCHED.`	Disruption solved by moving the visit to another time or day	RESCHED. CG's son has a procedure. Visit moved to Wednesday, client agreed. - NC
`ATT.`	Any coverage attempt: call, text, or voicemail to a caregiver	ATT. Called Ann about Saturday's shift, LVM. Texted Joe, no answer. - IM
`CG DECLINED.`	A caregiver was offered the shift and said no	CG DECLINED. Offered the shift to Dorothy, she can't do mornings. - RA

Quick decision guide

- Who cancelled? Caregiver with notice → CG CANCEL. | Caregiver without notice → NCNS. | Client → CL CANCEL.
- Planned in advance (days off requested ahead of time)? → TORF.
- Client says they are OK without coverage → NO REPL. If we offered someone and they said no → CL REFUSED.
- Fixed it by moving the visit instead of replacing? → RESCHED.
- Working on coverage: every call/text attempt → ATT. A caregiver turned the shift down → CG DECLINED.

Good to know

- One prefix per note. If two things happened, write two notes (e.g., a CG CANCEL. note and later a RESCHED. note).
- Keep using the activity tags exactly as today, prefixes complement tags, they do not replace them.
- This list is closed: new prefixes only through a formal SOP update, so the system stays simple.
