
STANDARD OPERATING PROCEDURE

Client Success Team

Document Control

SOP ID: CST-OPS-001

Title: Standard Operating Procedure — Client Success Team

Department: Operations

Function: Client Success, Service Coordination, Scheduling Support, Documentation, Quality Follow-Up, and Continuity of Care

Version: 1.0

Effective Date: 05 / 01 / 2026

Approved By: Administrator / Director of Strategic Growth and Compliance

Review Cycle: Monthly during implementation period; quarterly thereafter

Document Owner: Operations / Compliance

1. Purpose

The purpose of this Standard Operating Procedure is to establish a formal, consistent, and auditable framework for the **Client Success Team**. This SOP is intended to ensure that all responsibilities tied to client continuity, service coordination, scheduling support, client journey execution, quality monitoring, documentation, and follow-up are carried out in a structured and accountable manner.

This SOP is designed to:

- strengthen continuity of care and service
 - standardize communication and handoff practices
 - reduce ambiguity in role execution
 - reinforce ownership and accountability
 - improve documentation and visibility
 - support stronger client and caregiver experience
 - reduce preventable operational failures
 - create a clearer partnership model between in-office and remote team members
-

2. Policy Statement

It is the policy of the organization that all Client Success Team workflows be managed in a timely, professional, consistent, and fully documented manner.

No request, issue, update, escalation, handoff, schedule change, client concern, caregiver concern, or operational decision shall be considered complete unless:

- 
1. there is a clearly identified owner
 2. the action taken has been documented
 3. the current status or outcome is visible
 4. a follow-up owner is assigned when the matter remains open
 5. the workflow is marked closed or clearly documented as pending

The Client Success Team shall operate under a closed-loop standard at all times.

3. Scope

3.1 Included in Scope

This SOP applies to all staff assigned to the Client Success Team and includes responsibilities related to:

- client journey execution
- intake-to-profile translation
- client profile and care plan setup in WellSky
- client and caregiver service coordination
- scheduling and staffing support
- call handling and request management
- coverage protection
- quality follow-up

- documentation and notes
- event and profile tag usage
- payroll and billing review support
- handoffs between in-office and remote staff
- escalations and operational visibility

3.2 Excluded from Scope

This SOP does not authorize the Client Success Team to independently perform:

- clinical decision-making requiring licensed oversight
- changes to care plan content requiring clinical review when applicable
- HR disciplinary action or employment investigation
- final payroll processing
- final billing release
- rate changes outside delegated authority
- legal determinations
- formal responses to legal matters without approval
- undocumented or off-system operational arrangements

4. Team Structure and Role Objective

4.1 Client Success Team

The Client Success Team is the operational function responsible for protecting client continuity, organizing service support, strengthening the client experience, managing workflow visibility, and ensuring that all relevant requests, updates, and issues are handled with ownership, coordination, and follow-through.

4.2 Director of Client Success

The Director of Client Success is the **in-office role** within the Client Success Team. This role serves as the field-based and territory-facing operational lead for the assigned location. The Director of Client Success is responsible for direct client-facing execution that requires local presence, intake translation into WellSky, client profile creation, care plan setup support, in-person quality and retention efforts, and local operational leadership.

4.3 Care Coordinator

The Care Coordinator is the **remote role** within the Client Success Team. This role serves as the centralized coordination partner to the Director of Client Success and is responsible for day-to-day operational continuity through phone handling, staffing and scheduling support, request management, documentation of event-based workflows, time-related issues, payroll and billing review support, and escalation of unresolved matters.

4.4 Operational Hierarchy

Within the daily operational structure, the Director of Client Success serves as the in-office lead for the assigned territory and the Care Coordinator serves as the remote coordination partner assigned to support that territory.

For day-to-day workflow execution:

- the Care Coordinator reports operationally to the assigned Director of Client Success
- the Director of Client Success maintains visibility and leadership over territory-based priorities
- both roles are expected to work as one coordinated team

This hierarchy defines operational workflow coordination and visibility. It does not replace formal reporting lines established by leadership.

4.5 Team-Based Execution Model

Although responsibilities differ by location and function, the Director of Client Success and the Care Coordinator are not intended to operate as separate silos. They are expected to function as a **paired Client Success Team**, with each role owning a different portion of the workflow while maintaining constant visibility and alignment with the other.

The success of the model depends on:

- consistent communication
- accurate handoffs
- defined ownership
- respect for role boundaries
- mutual accountability for team results

5. Definitions

Client Journey: The full progression of client onboarding, intake translation, profile creation, introduction, quality touchpoints, retention efforts, and continuity support.

Event Tag: A tag used to classify the reason for a call, request, issue, update, or event.

Profile Tag: A tag used to classify client or caregiver characteristics for planning, matching, visibility, and care coordination.

Closed Loop: A workflow that has a clear owner, action taken, documented outcome, and confirmed closure or assigned pending follow-up.

Critical Client: A client whose uncovered or disrupted service may create immediate operational, safety, or reputational risk.

Three-Way Match: Comparison of scheduled shift, verified shift, and documented explanation for any variance.

Handoff: The documented transfer of visibility, ownership, or next-step responsibility from one team member or department to another.

Quality Visit: An in-person quality-related client touchpoint completed by the Director of Client Success.

Quality Call: A phone-based quality-related touchpoint completed by the Care Coordinator.

6. Roles and Responsibilities

6.1 Client Success Team

The Client Success Team is collectively responsible for:

- protecting continuity of care and service
- ensuring timely response to client and caregiver needs
- maintaining accurate documentation
- coordinating across departments
- reducing open-loop workflows
- supporting quality and retention
- ensuring all matters are handled with visibility and ownership

6.2 Director of Client Success

The Director of Client Success is responsible for:

- serving as the in-office operational lead for the assigned territory
- taking intake information and translating it into WellSky
- creating or updating the client profile in WellSky
- ensuring care plan information is translated accurately according to intake documentation and approved process
- applying and maintaining client and caregiver profile tags where applicable
- completing intro visits, supervisory visits, home safety assessments, and quality visits
- carrying out in-person retention efforts
- ensuring consistent completion of the client journey

- contributing to the overall growth, success, readiness, and professionalism of the office
- helping maintain a clean, organized, and professional office environment consistent with agency standards
- meeting daily with the assigned Care Coordinator for recap, alignment, and handoff

6.3 Care Coordinator

The Care Coordinator is responsible for:

- staffing and scheduling support
- phone handling and request triage
- responding to client and caregiver calls
- documenting event-based workflows using event tags
- managing missed clock-ins and clock-outs
- handling last-minute changes and call-offs
- supporting payroll and billing review through documented exception management
- completing quality calls as assigned
- protecting service continuity by reducing avoidable cancelled shifts
- escalating unresolved matters to the Director of Client Success
- maintaining strong visibility on open items and pending follow-up

6.4 Supervisor / Operations Leadership

Supervisor or Operations Leadership is responsible for:

- escalation review
- priority conflict resolution
- approval of out-of-scope actions
- KPI review and performance coaching
- support with repeated service failures or quality breakdowns

6.5 Intake / Admissions Support

Where applicable, Intake or Admissions Support may collect intake data; however, the Director of Client Success owns the translation of that information into WellSky for profile setup and care plan-related profile structure.

6.6 Recruiting / HR

Recruiting and HR are responsible for:

- caregiver employment status
- onboarding status
- file readiness
- employment-related decisions

6.7 Payroll / Billing

Payroll and Billing are responsible for final processing. The Client Success Team supports by identifying, documenting, and clarifying operational exceptions before final handoff.

6.8 Administrator / Compliance Leadership

Administrator and Compliance Leadership are responsible for:

- high-risk complaint oversight
 - compliance-related exceptions
 - legal-risk review
 - confidentiality or incident-related escalation
 - formal resolution of major operational risk items
-

7. Systems and Approved Communication Channels

7.1 Approved Systems

Approved systems may include:

- WellSky
- Paycor
- phone system / IVR
- approved email
- approved secure messaging platforms
- other approved tracking or reporting tools designated by leadership

7.2 Communication Standard

No workflow shall be considered complete solely because it was verbally communicated or informally discussed. Completion requires documentation in an approved system or approved operational format.

8. Procedure

8.1 Scheduling and Coverage Management

8.1.1 Objective

To ensure that all active client shifts are reviewed, assigned, confirmed, monitored, and documented in a manner that protects service continuity and reduces preventable coverage failures.

8.1.2 Preconditions

Before assigning, confirming, or changing a shift, the assigned team member shall verify:

- client is active
- current schedule is valid
- service parameters are current
- caregiver is active and appropriate for assignment
- any known restrictions, preferences, or compatibility concerns have been reviewed
- applicable service or payer considerations are visible where relevant

8.1.3 Daily Scheduling Workflow

The Client Success Team shall complete the following daily scheduling workflow:

1. review same-day, next-day, and short-term upcoming schedules
2. identify open shifts, tentative assignments, call-out risks, and coverage gaps
3. confirm assignment appropriateness based on client needs, caregiver suitability, and availability
4. communicate changes to the relevant caregiver and client when applicable
5. document the reason for the change, the action taken, and the outcome
6. monitor execution of the shift for any irregularity
7. close the loop or escalate if unresolved

8.1.4 Call-Out, No-Show, and Urgent Change Response

When a caregiver calls off, fails to appear, or a same-day urgent change occurs, the assigned team member shall:

1. confirm the details immediately
2. determine urgency and impact to the client
3. notify the client or responsible party when applicable
4. begin replacement efforts or alternative plan activation
5. document all outreach attempts, internal coordination, and status updates
6. escalate when client safety or service continuity is materially affected
7. record final disposition and closure status

8.1.5 Scheduling Control Standard

A scheduling matter is not considered complete unless:

- the schedule reflects the correct status
 - relevant communication has occurred
 - a complete note has been entered
 - any remaining pending matter has an owner
 - the status is visibly closed or pending with follow-up
-

8.2 Billing and Payroll Accuracy Support

8.2.1 Objective

To support accurate billing and payroll through documented review, exception identification, and proper clarification before final handoff.

8.2.2 Core Control: Three-Way Match

All time-related review shall be supported by a three-way comparison:

1. scheduled shift
2. verified shift / EVV record
3. documented explanation for any difference

Any mismatch is an exception and must be addressed.

8.2.3 Reconciliation Process

The assigned Client Success Team member shall:

1. review schedule and verification records
2. confirm date, time, caregiver, client, and service alignment
3. identify missing clock-ins/outs, mismatches, duplicates, or unsupported changes
4. request clarification where necessary
5. document findings, action taken, and current status
6. escalate unresolved or repeated issues to leadership or Payroll/Billing as required

8.2.4 Control Boundary

The Client Success Team may review, document, and clarify operational exceptions, but may not independently finalize payroll or billing unless explicitly authorized.

8.3 Client Requests, Service Concerns, and Complaint Handling

8.3.1 Objective

To ensure all client requests, service concerns, and complaints are received, documented, triaged, followed up, and closed in a timely and professional manner.

8.3.2 Accepted Channels

Requests may be received by:

- phone
- voicemail
- email
- secure message
- internal handoff
- other approved communication channels

8.3.3 Logging Requirement

Every request must be logged on the same day received or by the next business day at the latest.

8.3.4 Request Categories

Requests may include:

- schedule change
- caregiver timeliness
- no call no show
- complaint
- billing/pay concern
- returning call
- client update
- service quality concern
- other operational follow-up

8.3.5 Request Handling Procedure

The assigned team member shall:

1. log the request
2. identify the owner
3. apply the correct event tag if event-based
4. determine urgency and type of action required
5. take or assign action

6. document the outcome or current status
7. close or assign follow-up with visibility

8.3.6 Complaint Handling Standard

Complaints must be documented with enough detail to support:

- trend identification
- performance review
- coaching
- corrective action
- service recovery efforts

Repeated complaints shall not be treated as isolated events.

8.4 Cross-Department Coordination and Handoffs

8.4.1 Objective

To ensure that workflows crossing departments or roles do not lose visibility, ownership, or continuity.

8.4.2 Required Coordination Points

Coordination is required when:

- a new client starts
- a service schedule changes materially
- a caregiver is assigned or removed
- a complaint affects service or retention
- payroll or billing discrepancies appear
- a weekend/on-call issue remains unresolved
- profile information is missing and must be updated in WellSky

8.4.3 Minimum Handoff Information

Every handoff must include:

- what happened
- what action was taken
- what remains pending
- who owns the next step
- priority level if relevant
- whether the item is open or closed

8.5 Escalation Requirements

8.5.1 Immediate Escalation

Immediate escalation is required for:

- client safety risk
- suspected abuse, neglect, or abandonment
- critical uncovered client
- confidentiality breach
- emergency or law-enforcement-sensitive matter
- major operational incident
- formal complaint with high legal or reputational exposure

8.5.2 Escalation Within 24 Hours

Escalation within 24 hours is required for:

- repeated call-off or no-show patterns
- repeated documentation failures
- recurring complaint patterns
- repeated payroll or billing-related discrepancies
- ongoing caregiver-client mismatch
- unresolved operational issues outside role authority

8.5.3 Escalation Documentation

Every escalation shall include:

- issue summary
- who is affected
- immediate risk
- action already taken
- support or decision needed
- date, time, and person notified

8.6 Documentation Standards

8.6.1 General Standard

If an action is not documented, it shall be treated as not completed.

8.6.2 Minimum Note Requirements

At minimum, documentation must include:

- date/time
- event
- summary
- action
- outcome
- follow-up owner
- closure status

8.6.3 Documentation Quality

Documentation must be:

- clear
- objective
- professional
- specific
- useful for continuation by another team member
- sufficient for audit and operational review

9. Service Level Standards

Unless otherwise directed by leadership, the following minimum standards apply:

- request acknowledgment: within 2 business hours
- urgent same-day service disruption: action initiated within 30 minutes
- non-urgent schedule request: within 24 business hours
- payroll or billing concern: status update within 3 business days
- service complaint: same day or next business day based on severity

10. Quality Assurance and Performance Monitoring

10.1 Purpose

The purpose of this section is to establish a performance monitoring framework aligned with the role differentiation within the Client Success Team.

10.2 Performance Monitoring Standard

Performance shall be reviewed not only by volume of completed tasks, but also by:

- quality of work
- consistency
- responsiveness
- documentation standards
- handoff quality
- ownership
- workflow closure
- contribution to client experience and office success

10.3 Role-Based KPI Assignment

Because the Director of Client Success and the Care Coordinator have different primary responsibilities, KPIs shall be assigned according to role.

10.4 Director of Client Success KPIs

10.4.1 QA Visits

Measures completion, timeliness, and quality of in-person QA visits.

10.4.2 Client Journey Completion

Measures consistent completion of required client journey steps such as intake translation, profile creation, introduction, quality touchpoints, and retention-related in-person support.

10.4.3 Complaint Occurrences

Measures the number and frequency of complaints tied to responsibilities influenced by the Director of Client Success, especially in-person service quality, local follow-up, and journey consistency.

10.4.4 Meetings with Care Coordinators

Measures regularity and usefulness of daily or recurring coordination touchpoints with the assigned Care Coordinator.

10.5 Care Coordinator KPIs

10.5.1 Phone Handling

Measures the quality, timeliness, professionalism, and completeness of phone-based workflow handling.

10.5.2 Percentage of Calls Answered

Measures responsiveness to incoming calls within assigned workflow coverage.

10.5.3 Payroll and Billing Correction Rate

Measures the rate of preventable corrections required after time review and payroll/billing support activity.

10.5.4 Coverage / Avoided Cancelled Shifts

Measures the ability to maintain continuity, reduce avoidable cancellations, and protect coverage through timely coordination and follow-up.

10.6 Shared Performance Expectations

Regardless of role, all Client Success Team members remain accountable for:

- note quality
- proper tag use
- timely follow-up
- ownership
- communication
- escalation discipline
- closed-loop execution

10.7 Review Rhythm

10.7.1 Weekly Review

Weekly review may include:

- open issues
- complaints
- coverage concerns
- phone-handling performance
- unresolved handoffs
- QA follow-up
- documentation quality

10.7.2 Monthly Review

Monthly review shall include:

- KPI trend review
- root cause patterns
- coaching needs
- role-specific performance discussion

- process improvement needs
- workflow and handoff consistency

10.8 Corrective Action and Coaching

Where repeated underperformance, inconsistency, weak documentation, poor handoff discipline, or quality concerns are identified, leadership may initiate:

- retraining
 - closer monitoring
 - additional review
 - corrective coaching
 - role-specific process adjustment
-

11. Required Forms, Logs, and Standardized Tools

The following tools shall be used as applicable:

- daily coverage tracker
 - open shift tracker
 - call-off response log
 - payroll and billing exception log
 - client request log
 - complaint tracking log
 - new client start checklist
 - daily recap template
 - handoff template
 - quality visit form
 - quality call form
 - note template
 - KPI review format
-

12. Acceptance Criteria

A workflow shall be considered complete only when:

1. action has been taken or appropriately escalated
2. the relevant system or record has been updated
3. the required note has been entered
4. the correct tag has been applied where applicable
5. pending follow-up has a defined owner
6. closure status is visible

13. Compliance and Operational Risks Addressed by This SOP

This SOP is intended to reduce:

- uncovered shifts without response trail
 - undocumented schedule changes
 - weak handoffs between roles
 - poor visibility of unresolved matters
 - incomplete client journey execution
 - poor note quality
 - inconsistent tag usage
 - payroll and billing inaccuracies tied to weak documentation
 - complaint recurrence without tracking or action
 - lack of clarity between in-office and remote responsibilities
-

14. Use of Tags

14.1 Purpose

Tags shall be used as a standardized operational tool to support documentation, matching, reporting, segmentation, follow-up, and handoff quality.

Within the Client Success Team, tags are divided into two groups:

1. **Event Tags**
2. **Profile Tags**

These tag groups have different purposes and different role ownership.

14.2 Event Tags

14.2.1 Definition

Event Tags are used to identify the reason for a call, request, issue, update, or event-based communication.

14.2.2 Required Structure

The standard Event Tag structure is:

Event Call + Reason

Examples:

- Client Called + Schedule Change
- Client Called + Billing
- Caregiver Called + Call Off
- Recruiting + Employment Inquiry

14.2.3 Event Tag Table

Approved event structures include:

Category	Event Tag	Used For	Notes	Requirement
Client Calls	Client Called + Schedule Change	Client calls	Use when client requests a schedule change, cancellation, or reschedule.	Mandatory
Client Calls	Client Called + Caregiver Timeliness	Client calls	Use when client reports caregiver late arrival or timeliness concern.	Mandatory
Client Calls	Client Called + No Call No Show	Client calls	Use when client reports caregiver did not arrive and no proper communication occurred.	Mandatory
Client Calls	Client Called + Client Complaint	Client calls	Use for service dissatisfaction, caregiver complaint, office complaint, or other complaint raised by client.	Mandatory
Client Calls	Client Called + Billing	Client calls	Use for billing questions, payment concerns, or invoice-related matters.	Mandatory
Client Calls	Client Called + Returning Call	Client calls	Use when client is returning a previous call.	Mandatory
Client Calls	Client Called + Client - Other	Client calls	Use only when no other client event tag applies.	Mandatory when applicable
Caregiver Calls	Caregiver Called + Missed Clock In/Out	Caregiver calls	Use when caregiver reports missing or incorrect clock-in or clock-out.	Mandatory

Category	Event Tag	Used For	Notes	Requirement
Caregiver Calls	Caregiver Called + Availability Change	Caregiver calls	Use when caregiver updates ongoing or temporary availability.	Mandatory
Caregiver Calls	Caregiver Called + Payroll	Caregiver calls	Use for payroll-related questions or concerns.	Mandatory
Caregiver Calls	Caregiver Called + Call Off	Caregiver calls	Use when caregiver reports off for a shift.	Mandatory
Caregiver Calls	Caregiver Called + Returning Call	Caregiver calls	Use when caregiver is returning a previous call.	Mandatory
Caregiver Calls	Caregiver Called + Caregiver - Other	Caregiver calls	Use only when no other caregiver event tag applies.	Mandatory when applicable
Recruiting	Recruiting + Employment Inquiry	Recruiting-related calls	Use for applicants or employment inquiries.	Mandatory when applicable
Inside Sales	Inside Sales + Follow Up	Inside sales calls	Use for sales follow-up and prospective client call-backs.	Mandatory when applicable

14.2.4 Event Tag Standard

Care Coordinators are the primary users and owners of Event Tags.

Care Coordinators shall use Event Tags for:

- incoming and outgoing call documentation
- day-to-day event-based workflows
- client and caregiver requests
- service changes
- call-offs
- clock-in/clock-out issues
- billing or payroll-related call events
- phone-related handoffs and updates

If missing or outdated profile information is identified during an event-based interaction, the Care Coordinator must document the event and route the profile update need to the Director of Client Success.

14.3 Profile Tags

14.3.1 Definition

Profile Tags are used to identify client and caregiver profile characteristics that support matching, visibility, intake translation, care profile setup, and service planning.

14.3.2 General Standard

Directors of Client Success are the primary users and owners of Profile Tags.

Because the Director of Client Success is responsible for taking intake information and translating it into WellSky in order to create the client profile and care plan, this role is responsible for applying, reviewing, and maintaining Profile Tags.

14.3.3 Profile Tag Table

Profile Tags include categories such as:

- location
- triage
- caregiver ranking
- driving
- transportation
- payment method
- payor source
- VA type
- care/program match
- service availability
- details
- vaccination status
- skills
- other profile identifiers

Applies To	Category	Approved Tag(s)	Notes	Requirement
Both	Location	1202 BLANCO; 1202 BURNET; 1202 DS; 1202 KINGSLAND; 1202 LLANO; 1202 LW; 1202 MF	Use only one location tag per client or caregiver profile for primary office/territory alignment.	Mandatory
		1355 AUSTIN; 1355 KYLE/BUDA; 1355 LOCKHART/LULIN; 1355 SAN MARCOS; 1355 SEGUIN; 1355 WIMBERLY		
		1410 BASTROP/SMITHVILLE; 1410 ELGIN/MANOR; 1410 HEMPSTEAD/NAVASOTA; 1410 LA GRANGE/COLUMBUS; 1410 SEALY; 1410 SOMMERVILLE/BRENHAM		
		AUSTIN CENTRAL; AUSTIN EAST; AUSTIN NORTH; AUSTIN SOUTH; AUSTIN-SOUTH Y		
Both	Care Program	Companion PAS	Use for service matching and profile visibility as applicable. Companion Care = no hands-on assistance.	Mandatory when applicable
Clients	Triage	Triage I; Triage II; Triage III; Triage IV	All clients must have one triage tag. Used for prioritization and caregiver matching.	Mandatory

Applies To	Category	Approved Tag(s)	Notes	Requirement
Clients	Transportation	Client Car; Caregiver Car	Client only. Used to identify transportation arrangement expectations.	Good to have
Clients	Payor Source	Pay: LTC; Pay: Private; Pay: VA; Pay: AAA; Pay: GUIDE	If Pay: VA is selected, VA-31 or VA-99 must also be selected.	Mandatory
Clients	VA Type	VA-31; VA-99	Use only when payor source is Pay: VA .	Mandatory when applicable
Clients	Details	Pets in Home; No Pets; Smoker	Used to support caregiver matching and visit preparation.	Good to have
Clients	Other	New Client	Use for every new client at intake/start of care.	Mandatory at start of care
Caregivers	Caregiver Rating	Top 1; Top 2; Top 3	Top 1 = highest level caregiver. Top 3 = lowest level. Used for matching with client triage based on skills and overall fit.	Mandatory
Caregivers	Driving	Driving OK; Not Driving	Caregiver only. Use only these two values.	Mandatory
Caregivers	Service Availability	Live-In; Overnights; Weekends	Based on caregiver availability and used for assignment decisions.	Mandatory
Caregivers	Vaccination Status	Vaccinated; Unvaccinated	Used when relevant for matching or client preference.	Good to have
Caregivers	Skills	Bilingual	Used when language compatibility is relevant for placement.	Good to have
Caregivers	Other	Rehirable; Non-Rehirable	Use at the time of caregiver deactivation.	Mandatory at deactivation

14.3.4 Profile Tag Rules

- Profile Tags must be applied accurately and kept current
- missing required profile information must be addressed by the Director of Client Success
- Care Coordinators do not independently own Profile Tag maintenance unless specifically assigned
- Profile Tags are part of the client or caregiver record, not the event note

14.3.5 Tagging Expectations

Before saving or updating a record, the responsible team member shall confirm:

- the correct tag group is being used
- the tag is accurate and current
- mandatory tags have been completed
- the tag supports reporting, matching, and visibility needs

14.3.6 Control Standard

Incorrect, missing, or inconsistent tags weaken reporting, visibility, matching, and handoff quality. Role-specific tag ownership shall therefore be followed consistently.

15. Use of Notes

15.1 Purpose

Notes are the official record that protects continuity, accountability, service quality, handoff quality, and communication between teams.

15.2 Documentation Standard

Every request, issue, update, handoff, and decision must have:

1. a clear owner
2. documented action taken
3. outcome or current status
4. follow-up owner if pending
5. closure status

15.3 Standard Note Format

The standard note format is:

Date/Time

Event

Summary

Action

Outcome

FU/Owner

Closed: Y/N

15.4 Note Completion Requirement

A note is not complete unless it includes:

- correct event
- correct event tag where applicable
- what happened
- what was done
- the result
- whether follow-up is needed
- who owns the next step
- whether the matter is closed

15.5 Note Quality Standard

Notes must be clear enough for another person to understand the workflow without verbal explanation. Weak notes create risk, reduce continuity, and weaken accountability.

16. Role Differentiation: Weekday vs. Weekend and On-Call Coverage

16.1 Weekday Coverage

During regular weekday operations, workflows are typically managed by the assigned Director of Client Success and Care Coordinator pair for the relevant territory.

16.2 Weekend and On-Call Coverage

Weekend and on-call coverage follows the same standards for documentation, escalation, and closure; however, requests may come from all territories rather than a single assigned territory.

16.3 Weekend and On-Call Responsibilities

Weekend and on-call coverage staff shall:

- receive and triage requests across all covered territories
- document all event-based activity
- escalate when required
- assign next owner where follow-up remains pending
- ensure no item remains undocumented

16.4 Handoff Requirement

Any unresolved weekend or on-call issue must be handed off with a documented summary including:

- event
- action taken
- pending need
- next owner
- current status

16.5 Closed-Loop Standard

No workflow shall remain open without visibility, ownership, and documented next steps.

17. Responsibility Differentiation Based on Staff Location

17.1 Purpose

Responsibilities are differentiated by staff location in order to improve clarity, accountability, and efficiency, while still maintaining one coordinated Client Success Team.

17.2 Operational Hierarchy and Reporting Relationship

The Director of Client Success serves as the in-office operational lead for the assigned territory. The Care Coordinator serves as the remote coordination partner for that territory.

Remote staff shall report operationally to the Director of Client Success for:

- daily priorities
- territory workflow visibility
- unresolved items
- service concerns

- handoff alignment
- end-of-day recap and next-step planning

17.3 Director of Client Success Responsibilities

The Director of Client Success is responsible for:

- intake translation into WellSky
- creation and maintenance of client profile and care plan structure
- profile tag ownership
- QA visits
- supervisory visits
- intro visits
- home safety assessments
- quality visits
- in-person retention efforts
- consistent completion of the client journey
- contributing to the overall growth and success of the office
- supporting a clean, organized, and professional office environment
- daily recap and coordination with the assigned Care Coordinator

17.4 Care Coordinator Responsibilities

The Care Coordinator is responsible for:

- staffing and scheduling support
- phone handling
- event tag ownership
- percentage of calls answered
- request triage and event-based documentation
- missed clock-ins and clock-outs
- payroll and billing review support
- coverage management
- avoiding avoidable cancelled shifts
- quality calls
- communicating unresolved matters to the Director of Client Success

17.5 In-Person Retention and Client Journey Ownership

The Director of Client Success carries primary responsibility for in-person retention and for ensuring the client journey is completed consistently and appropriately.

17.6 Daily Coordination Between Director and Care Coordinator

At minimum, the Director of Client Success and the Care Coordinator shall maintain a daily recap touchpoint covering:

- key events of the day
- unresolved issues
- scheduling concerns
- client concerns
- caregiver concerns
- pending follow-up
- priorities for the next day where applicable

17.7 Shared Standards Across Both Roles

Both roles remain accountable for:

- professionalism
- documentation quality
- follow-up
- tag discipline according to role ownership
- escalation
- teamwork
- closed-loop execution

17.8 Handoff and Visibility Standard

Whenever a workflow moves from one role to the other, the handoff must identify:

- what happened
- what was done
- what remains pending
- next owner
- open or closed status

No matter shall be left without visibility or ownership.

18. Short Daily / Weekly Checklists

18.1 Director of Client Success Daily / Weekly Checklist

Daily

- review territory priorities
- review new intake and profile setup needs
- update WellSky client profile and care plan structure as assigned
- confirm profile tags are accurate where needed
- complete field-based or in-person client journey activities
- review pending complaints or quality concerns requiring local action
- conduct daily recap with assigned Care Coordinator
- close or assign unresolved matters

Weekly

- review QA visits completed
- review client journey completion
- review complaints and trends
- review profile accuracy and intake-to-profile consistency
- review coordination and handoff quality with Care Coordinator
- identify process improvement or retraining needs

18.2 Care Coordinator Daily / Weekly Checklist

Daily

- review incoming calls and requests
- document event-based workflows using correct Event Tags
- update scheduling changes
- follow up on call-offs and coverage risks
- review missed clock-ins and clock-outs
- support payroll and billing-related exception handling
- escalate unresolved items to the Director of Client Success
- ensure all event-based workflows are documented and visibly closed or assigned

Weekly

- review phone handling performance
- review percentage of calls answered
- review payroll and billing correction trends
- review coverage results and avoidable cancellations
- identify repeated issues for escalation or coaching
- review handoff quality and open-loop risks
